

Portable fan-cooled, MIG welding machine. Wheel mounted for easy manoeuvrability around the workshop. Equipped with electronic timer for spot welding, burn back and slope up wire regulation. The 1800 (single phase - 240 volt ) has 6 welding steps. The unit is capable of welding Steel, Stainless Steel and Aluminum, by changing both the wire and gas. Each comes complete with Euro Connector MIG torch, Argon/Co2 regulator and Earth Lead.
