

Portable fan-cooled, MIG welding machines. Wheel mounted for easy manoeuvrability around the workshop. Equipped with electronic timer for spot welding, burn back and slope up wire regulation. The 2000 (single phase - 240 volt) has 9 welding steps and the 2500T (three phase - 415 volt) 8 welding steps. Each unit is capable of welding Steel, Stainless Steel and Aluminum, by changing both the wire and gas. Each comes complete with Euro Connector MIG torch, Argon/Co2 regulator and Earth Lead.

	Current Range	Duty Cycle	Weldable Wires (steel)	Dimensions	Weight	Code
MAXMIG 2000	35-200 amps	100amps @60%	0.6 - 1.0mm	455x740x870mm	45kg	901002
MAXMIG 2500T	35-250 amps	120amps @ 60%	0.6 - 1.0mm	455x740x870mm	50kg	901003
