

CEMONT

WELDING & PLASMA CUTTING

SHARP 10 PLASMA CUTTER

Portable inverter for compressed air plasma cutting. High quality cutting on all conductive materials including steel, stainless steel, aluminium, copper, brass, etc. Lightweight. Low and current consumption. **10mm Severance Cut, 8mm Genuine Cut,** Thermal protection. Safety system for incorrectly assembled torch and for insufficient air pressure. Digital control of air pressure with condensate filter. Possibility of cutting gratings without automatic re-ignition of the pilot arc. Possibility of cutting painted surfaces.

Can cut up to 10mm thickness of steel and galvanized steel without earth. Applications include: plumbing, building construction, light metal structures, car body work.

8 bar pressure required. 240 volt 16amp single phase.

2 Year Warranty (W000050031)
